

STATEMENT ON GALLIUM AND GERMANIUM

August 16, 2023

Dear partner,

As you may already know, on the 3rd of July the Chinese Ministry of Commerce (MOFCOM) released a public notice setting new export controls on two groups of raw materials. They apply to the metal Germanium and its certain related compound, as well as metal Gallium and its certain related compound (both critical materials in the semiconductor industry). Starting from August 1st, Chinese exporters of gallium and germanium will have to apply for/obtain an export license before exporting the materials.

The products that Teesing designs, manufactures, assembles, and supplies, do not contain Gallium or Germanium.

We have provided this information to the best of our knowledge and assessment, and it is based on information and data which Teesing and its partners consider reliable. If anything changes for this statement, this will be updated and published on www.teesing.com

Best regards,

René Roozen
